

I hope to have something attached to the rifles like a grenade launcher that shields people from shots fired at them or any incoming mass. this would be like our company patented force field program that i have heard of that will be able to withstand two rockets, three tanks shells or a burst of automatic fire at once.

It needs to be either a set unit that goes up while troops are reloading, or attached to the barrels of guns, or both.

I was thinking medics could use these shields to protect the people while they are taking aim. this could withstand a avalanche of rockets. then they could lead in with their kits and help the wounded or advance on enemy territory.

This is to deflect fire from enemies. it might also be more useful against other's spells, yes?

If we want to shield ourselves with our magic, i suggest we upload the physics of the shield technology and open our hands or raise our fore arms to block. this would mean that we would need to learn the physical components to make it easier, of course.

"Stamatíste indpending kíndyno gia na échoun orgí se aftó to xéno."

To go invisible, you need to know your terrain, so a vector mapper that uploads things to your mind will help a lot, yes?

Seriously though, if you want to go invisible, you could use google glasses to map the terrain and then you could blend into it quite easily.

Or, you could use your eyes to look at the terrain for a minute or two, and then think of the colors of the terrain. then, you could

look at the vegetation or brick work too, this would only take a few seconds, of course.

Then, you could move into that area and think of the things you have 'mapped.' basic color and brick work would make you rather invisible on the walls and in the trees, but to get to the nitty gritty;

"eínai mia amartía , allá epitrépste mou na dénoun."

Then, you could try to imagine yourself as if you were changing your face! think of that mask of a thousand faces as a requirement for this, yes? instead of thinking of your face, think of your clothing and skin, both at the same time. imagine throwing a blanket over yourself, yes?

Okay, more work is required.

If you were to already have the required mask of a thousand faces spell slotted, then you could simply observe that clothing is also natural, and, will be made of the same stuff as the skin you have, at a cellular level anyways, as, in cotton or wet suits, they are made of bio stuff, yes?

Okay, more work is required.

To make this work out well, you also need to use photons onto your skin, or, even better deflect photons off your skin! this can be done by mastering the spell shield, of course!

More work is required.

So far, you need to [1] use the command words, or say them softly, and have mastered the [2] mask and [3] shield spells. you also need to [4] observe the area you are in, or moving to. maybe moving slowly would help?

Then, you need to know your color pallet! if you were to have all

the colors uploaded to your mind, you could observe where the colors mix and stuff, and, learn the chemicals of the colors. then, you could say;

"είναι μια αμαρτία , allá epitrépste mou na dénoun alláxete ta chrómata tou dérmatos mou."

To change your whole body from one signature to the next visually, yes? this new command line or wording replaces the previous one, of course, which was a work in progress.

Then, you need to learn not to make a noise and give off no heat nor smell, to fool attack dogs or the local pit bull in your neighborhood of course.

To do this, you need to alter your smell to that of the stuff around you, and, cool your body temporarily so that it gives off no heat, yes?

Then, you need to upload the chemicals to smell with, and, 'instructions' for cellular division and processing of fuels.

After you have uploaded this new information, you need to learn which smell smells like what, so, there must be a simple smell test of chemicals for horse dung and wet and new, wet cement. uploading these and other smells to the minds of the person will allow them to mask their smell in natural and urban environments, of course, but, the 'command' has changed now;

"είναι μια αμαρτία , allá epitrépste mou na dénoun , na alláxete ta chrómata tou dérmatos mou , epitrépste mou na myrísei se aftó syngenís , o Cody leitourgíes prépei na stamatísei gia leptó."

So now that should work. wait while i test it!

To get this to work properly we need more input!

So, you [1] say your command words, [2] think of the terrain, [3] think of your smells and heat signature and change them to

something you chemically know, [4] need to have mastered shield and mas spells, yes?

Also, you need to focus on your body while you move.

One important thing i forgot was noise! if you were to want to create no noise, as the google glasses of our can pick that up, you would need to scramble the glasses! this means you would need to throw your voice, which will be easy to learn by uploading the tricks of the magicians and mastering it at home, of course.

Digitally, though, you need to create no noise at all. this can be done by stopping your breathingby holding your breathe, which could be made easier with a deep diving spell, of course. but, we don't have that yet, so, we need to not even breathe out, as then we will be picked up on glasses!

So, we need to learn to hold our breathes from the world masters eventually, like mossad agents and stuff, to avoid detection. this can be done, i think, by uploading the techniques and practicing them, of course. if you were to learn controlled breathing from the army secret agent files, that would help too!

Now, we need to do this chemically, to stop the noise we need to create a silencer for this. this means we need to learn how sound suppression works with dance music equipment and how silencers for guns make it quite. this of course needs to be uploaded, or studied for months if you cannot afford an upload.

The command thus becomes;

"eínai mia amartía , allá epitrépste mou na dénoun , na alláxete ta chrómata tou dérmatos mou , epitrépste mou na myrísei se aftó moiázei , leitourgías tou sómatos prépei na stamatísei stin árnişi , den kánoun ton ícho gia dokimí tou chrónou , myrízei san louloúdia lígo ."

I think that is it!

- [1] say the commands softly,
- [2] see, smell and hear your terrain,
- [3] know mask of a thousand faces and shield spell,
- [4] focus your energies to change how you want them.
